THE ALL NEW

# AUTOTAMP

## CONSISTENCY WITH CONFIDENCE

Have you ever visited your favorite espresso bar or cafe only to find that the espresso drink you ordered yesterday was different than the one you ordered today? Autotamp was created with four things in mind:

### To Produce A More Consistent, Higher Quality Drink.

-AUTOTAMP automatically compresses your finely ground coffee flat and level into the group handle at a consistent 30-35 pounds of pressure. It is impossible to achieve this task when done with a common hand tamper.

### Increasing Speed Of Drink Preparation.

-AUTOTAMPS' easy to use, two stage compression lever allows you to produce drinks with a natural fluid motion using less steps, unlike the wrist twist of a hand tamper.

### Reduces Employee Related Injuries Due To Repetitive Movements

-AUTOTAMPS ergonomic design makes it easier to tamp by simply pulling a lever in a downward motion rather than using a twisting motion of the shoulder, arm and wrist involved in hand tamping.

### Minimizes Training Time

-AUTOTAMP eliminates the ongoing task of keeping employees and new staff informed on the proper procedures of tamping.

ALL STAINLESS, CHROME SOLID METAL CONSTRUCTION

DIMENSIONS: 17.25" tall 5.25" wide and 7.50" deep.

SHIPPING WEIGHT: 9.50lbs
